A Humanitarian Call to WHO to Provide Vaccines to HCWs Everywhere

By: Michael Diamond

Date : December 9, 2020

Join in Solidarity. Critical Call to Action:

Healthcare workers (HCW) are part of the frontline in the struggle against the COVID-19 pandemic worldwide. The ID-IRI (Infectious Diseases International Research Initiative) platform was the first to provide precise data on COVID-19 related HCW deaths in 37 countries and a paper was published in the International Journal of Infectious Diseases a couple of weeks ago (2021: 102; 239–241). **WE ARE DYING EVERYWHERE.**

A Humanitarian Call To Who To Provide Vaccines To Hcws Everywhere

At the moment, ID-IRI is planning to make a call to WHO for the provision of any type of vaccines free of charge and immediately to the HCWs worldwide, particularly to those living in countries with limited resources. This is not a political call or an action with commercial backgrounds. But, this a humanitarian call to WHO to provide vaccines to HCWs everywhere.

Your Participation In This Action

We are looking forward to your participation in this action. Below is a link that you can confirm your presence to stand with us. Please kindly click the link and insert your name, affiliation, etc. The last query says “Do you approve…”, please click “I approve …” option. Then click "Submit" button below the page.

ID-IRI will write a letter to WHO with the text included in the link you are to click. We will include the names of all who have clicked the link, included their details, and confirmed the letter.

Please kindly stand with us and assist HCWs worldwide.
