

We Want You! (Seeking Volunteers)

By: Michael Diamond

Date : November 24, 2015

Looking for Volunteers

We are currently looking for volunteers for the following positions:

Editors (levels 1 & 2):

Responsibilities include proofreading and copy editing. As we grow, many of the submissions from around the world will require grammar and structure improvements due to language issues and various levels of writing ability. As an Editor you will ensure that the final version reads well and is a true representation of the Author's intended message.

Engagement Coordinator:

Responsibilities include outreach, organizing and communication to local institutions, companies and organizations within countries or regions. This is your opportunity to represent your niche, your area of expertise or your geographic area. As Engagement Coordinator, you will encourage relevant submissions from those you feel will add to the conversation on InfectionControl.tips. Be the voice of your community, company or country.

Nursing Advocate:

Responsibilities include outreach, organizing and communication of topics, concerns and the sharing of successes and failures related to the nursing profession. We would like to establish a Nursing Advocate for each country.
